

FOR A CONTEMPORARY FEEL

Silent Gliss

WAVE CURTAIN HEADING SYSTEM

Contemporary curtain design

Silent Gliss has created a unique curtain heading system that turns traditional curtains into a striking, modern design statement.

As an alternative to traditional pinch, pencil pleat or goblet style headings, Wave offers a more contemporary look throughout the curtain drop: when opened, the curtains stack back neatly, and when closed the fabric hangs in a smooth, continuous wave.

NEAT CURTAIN STACK-BACK

Undulating curves when your curtains are closed transform into a neat stack-back when opened.

Hand or cord curtain tracks

Electric curtain tracks

WAVE CURTAIN TRACKS

Wave is compatible with a variety of Silent Gliss systems:

- Electrically operated curtain tracks
- Hand or cord operated curtain tracks
- Metropole, a decorative curtain pole system available in a wide range of colours and sizes

The reinvention of the classic curtain.

WAVE CURTAIN FABRICS

Silent Gliss offers a wide range of flame retardant fabrics which have been tested and proven to work well with our Wave curtain heading. The Fabrics section of this binder offers a range of colours, textures and transparencies to meet most needs.

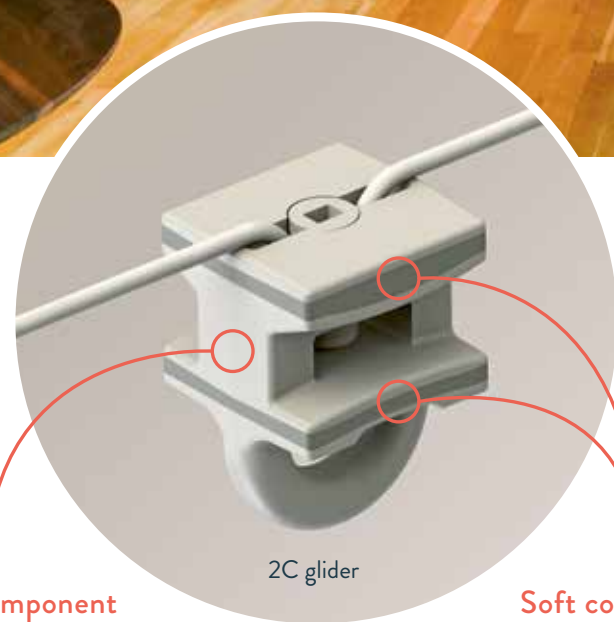

Alternatively, you can choose a fabric from the John Lewis range which is considered suitable for Wave. Please speak to a Partner for details.

Tip: Not all fabrics are suitable for Wave, seek advice before purchasing.

Silent Gliss fabrics Colorama 1 and 2 are proven to give an exceptional Wave effect throughout the full drop of the curtain. Both transparencies are available in over 40 colours. See the **Fabrics** section of this binder.

Hard component
for stability

Soft component
for noise absorption

2C glider

CURTAINS THAT DRESS THEMSELVES

The Wave effect is achieved by a unique glider-cord contained inside the curtain track which stops the fabric being pulled flat when the curtains are closed.

The evenly spaced gliders ensure a continuous wave effect throughout the full width and drop of the curtains.

THE SILENT REVOLUTION – TWO-COMPONENT TECHNOLOGY!

The premium 2C gliders and rollers (patent pending), combined with the specially coated tracks allow the curtain to move smoothly and silently. These gliders are manufactured using 2 materials, a hard component which ensures stability and a soft 'filling' to absorb the noise. The end result is unprecedented silence.

Technical summary – Wave curtain heading system

SIZE	SHAPE	OPERATION	SYSTEM REFERENCE	COLOURS AND OPTIONS
S/M		Hand 	SG 6820	<ul style="list-style-type: none"> – Available in white – 2C Glider technology – Optional draw rod to avoid touching the fabric
M		Hand 	SG 6840	<ul style="list-style-type: none"> – Available in white, matt white, silver, anodic grey, antique bronze and charcoal – 2C Glider technology – Optional draw rod to avoid touching the fabric
M		Hand 	SG 6870	<ul style="list-style-type: none"> – Available in white, matt white, silver, anodic grey, antique bronze and charcoal – 2C Glider technology – Optional draw rod to avoid touching the fabric
M		Cord 	SG 3840	<ul style="list-style-type: none"> – Available in white, matt white, silver, anodic grey, antique bronze and charcoal – 2C Glider technology – Optional intermediate pulley for heavier applications or cording at both ends
M		Cord 	SG 3870	<ul style="list-style-type: none"> – Available in white, matt white, silver, anodic grey, antique bronze and charcoal – 2C Glider technology
S/M/L		Electric 	SG 5100	<ul style="list-style-type: none"> – Available in white – Supplied with a 5m cable and three pin plug so no special wiring required – 'Touch & Go' feature allows the curtains to be operated by a small pull on one curtain – SG 5100B with wall switch – SG 5100R with wall switch + remote handset – SG 5100T with wall switch + timer – SG 5100TC with all control options

Track weight guide: S = Light weight curtains / M = Light to Medium weight curtains / L = Medium to Heavy weight curtains
