

Venetian Blind System Silent Gliss 8110

Silent Gliss Venetian Blind Systems

Precision Systems

Silent Gliss have precision Venetian blind systems for ultimate control over light and glare – small adjustments as the day goes on enable you to have maximum light and visibility.

Quality and warranty

All the material used for our Venetian blinds are rust free and UV resistant for perfect functionality and appearance over time. Extensive testing of our high quality products allows us the confidence to offer a 5 year warranty.

Precision

Our experienced specialists assemble every system manually to guarantee a precise and smooth operation – day after day!

Made-to-measure

Venetian blind systems are made-to-measure in relation to proportional aesthetics, window dimensions and individual taste.

The Blinds

Venetians at their best

The range includes Venetian blind systems with wand, chain, cord or electrical operation. Mono-controlled – one operation controls the tilting, raising and lowering of the blind. Whatever preference you may have, Silent Gliss offers the ideal made to measure Venetian blind system for your window. Available with 16, 25 and 50mm slats.

Mono controlled system Silent Gliss 8300

- Unique chain operated Venetian blind system, with one single, elegant metal chain
- The clever positioning of the chain makes operation easy and avoids entangling

Wand controlled system Silent Gliss 8110

- Easy and precise operation with a control wand due to integrated brakes
- Perfect closing of the slats due to “snap” system
- Privacy feature ensures no direct light penetration when the slats are closed, particularly useful when working or watching screens (25mm slats only)

Motorised systems Silent Gliss 8250 & 8960

Enjoy all the advantages of Venetian blinds with maximum ease of operation. The silent and precise motor ensures a smooth operation of the system at your fingertips. System SG 8960 available with 50mm slats.

Please see application charts at the back of this brochure for full range details.

Mono controlled system Silent Gliss 8910

The cord operated system features the unique "Quick Drop", one small pull on the operating cord and the blind will descend in a steady, controlled motion. The cord can then be used to adjust the tilt of the slat and to raise the blind. Available with 50mm slats.

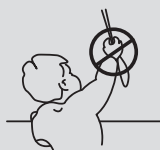

Silent Gliss and Child Safety

As children grow, so does their curiosity with the world around them. Every day, household objects can be dangerous to infants. Chains and cords from curtains or blinds have been identified as a potential risk to small children.

Therefore, all our chain operated blinds comply fully with the EN 13120.

WARNING

Young children can be strangled by loops in pull cords, chains, tapes and inner cords that operate the product. To avoid strangulation and entanglement, keep cords out of the reach of young children. Cords may become wrapped around a child's neck. Move beds, cots and furniture away from window covering cords. Do not tie cords together.

Personalise Your System

Exciting perforated, sand-coated and mirror slats are just a few examples of our aluminium slat range – which contains 64 eye-catching colours – giving you almost endless possibilities to personalise your system. Most of the colours are available with 16mm and 25mm slats.

Wood Venetians

The natural alternative

Available is a range of over 40 wood slats including textured and deep grain finishes in 50mm widths. The headrail is covered with a blind slat to ensure a complete match throughout the system. Available with cord operation or fully motorised.

Leather Venetians

Fully customised

We understand that sometimes you want a fully customised blind. When selecting a leather slat from our 37 exciting colours, you can choose the colour of your headrail, cords, stitching colour and even the finish on the eyelets!

Total Control

Silent Gliss radio control systems allow remote operation without the need of complex wiring.

Operation possibilities

- Variety of hand held and wall switches
- Single or multiple channel solutions
- Daylight controlled operation with light sensors
- Timer function
- Remote control by SMS
- Home automation connectivity
- Smart phones and tablets (eg. iPhone and iPad) connectivity

Remote controls Silent Gliss 9940

Remote controls Silent Gliss 0450

Silent Gliss Move App

Operate curtains, blinds and other electric Silent Gliss systems from your smartphone, tablet or desktop. Whether you are at home or on the road, this reliable and intuitive app allows you to program automatic opening and closing times.

Download the app in the Apple App Store, Google Play Store or Windows Store.
