Chain Release System

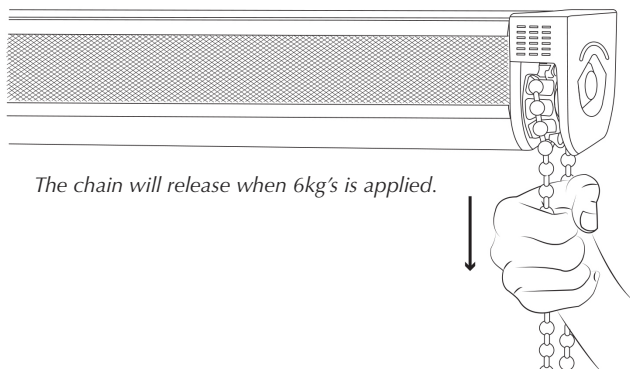

We've made a few changes to our Blind Cassette System and we think you'll be impressed with the new and unique features which makes it one of the best and most comprehensive systems in the industry.

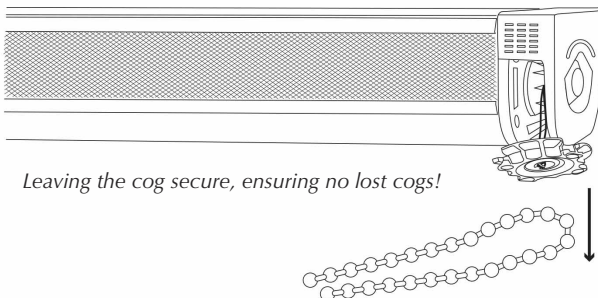

Want to watch a demo here? Click above.

Made to Measure

With our Made to Measure service you can now select our new chain release control unit at no additional cost! The new control unit is child safety compliant as the chain will release when 6kg or more is applied, ensuring the cog stays secure to the control unit and the chain safely falls away.

The chain will release when 6kg's is applied.

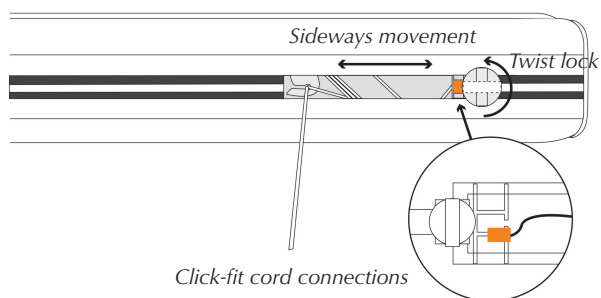

Leaving the cog secure, ensuring no lost cogs!

- ✓ Completely child safe system
- ✓ No lost cogs
- ✓ Simple reset
- ✓ Longer chain lengths up to 60cm from the floor
- ✓ No "P-Clip" so no drilling required
- ✓ Made to measure
- ✓ Fast operation 1:1 gearing (up to 3kg)
- ✓ Heavy weight blinds 1:3 gearing (up to 6kg)
- ✓ No additional costs
- ✓ British Standards BSEN13120:2009+A1:2014
- ✓ Supplied with labels and fitting instructions

Making Life Easy

As standard, all Made to Measure Blind Cassette Systems now come with the favoured "Twist and Lock" Cord Spools. This means its now quick and easy to adjust the spools and no tools are required!

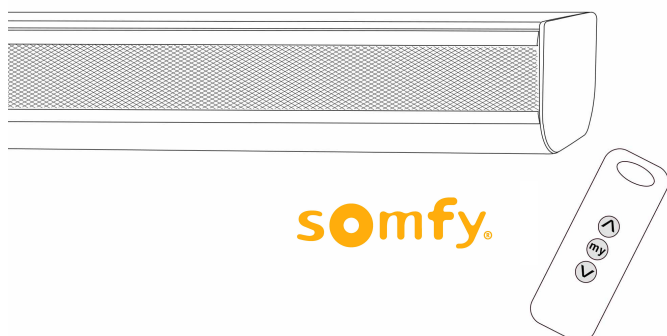

- ✓ Quick & easy to adjust the spools
- ✓ No tools needed
- ✓ Twist and lock button
- ✓ Quick release cord

Additional Extra's

Motorised Components

Combined with our blind cassette system, Somfy© components offer the best wire free motorised system with smooth operation and a choice of easy to use control options. The Somfy© motor is hidden discreetly in the cassette and are delivered cut to length, fully assembled and ready to use.

- ✓ Wire free systems
- ✓ Smooth and quiet operation
- ✓ Easy to use remote control
- ✓ Lift up to 4kg

CHILD SAFETY

Our Blind Systems are tested to British Standards BSEN13120:2009+A1:2014. Each system comes complete with all the labels, safety devices & instructions to make your blinds compliant.

Clip & Sew-On Toggles for Child Safety

Our H700 Cassette & H794 Cord Drawn Blind Systems include our new Sew-On Safety Toggle (H700ST) designed & developed by Jones Interiors. This exclusive product allows you the freedom to use Brass Rings (H66), Polycarbonate Rings (H362), or Cording Eyelets (H4031) to utilise your preferred method of manufacture. These new toggles must be sewn to the lowest cord attachment points across the bottom of your blind - we recommend Güttermann heavy duty core spun thread (A782). We have had all these methods independently tested & verified to BSEN13120:2009+A1:2014

For H700 Cassette Systems these Safety Toggles provide compliancy with the regulations relating to internal cords. For H794 Cord Drawn Blind Systems, you will also need to fit our Safety Break Cord Pull (H862CP), & use both the cleat & our cord (H862) provided in the system. Each Toggle has a maximum lift capacity of 1kg so please consider the number

of cords you might need for any heavy blinds. We also stress that our compliancy certification is only valid when these toggles are used in conjunction with H862 Blind Cord page 295.

These Toggles are available as contract components as are our alternative design, H700CT Clip-On Safety Toggle for use with tapes. The clip design will attach directly onto the woven pockets of our Roman Blind Tapes with no sewing required. In all other respects they will operate exactly as our "Sew-On" version see page 292.

Full instructions will be included with all kits and all our Safety Devices are tested to BSEN16433:2014 & BSEN16434:2014.
