

## **CALCULATION FOR REGULAR AND DOUBLE DUTY INTERMEDIATE BRACKETS**

To calculate the required number of Regular and Double Duty Intermediate Brackets, use the following formula

***Track length / 55 + 1 then round up***

***e.g***

***Track length 500cm***

***Divide by 55***

***Equals***

***9.09***

***Add 1***

***Equals***

***10.09***

***Round up***

***Equals***

***11***

***So, a 500cm length of track needs 11 intermediate brackets***
