

Roller Blind Improvements

We are pleased to confirm that Silent Gliss have now launched a range of improvements to our roller blinds.

Bottom Bars

The Silent Gliss range of roller blind bottom bars has been harmonised across the systems and includes two designs (round and rectangular), with metal end covers.

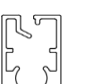

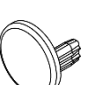

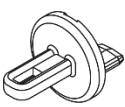

As well as looking great they deliver improved fabric hanging behaviour, have more room for the PVC strip and fabric and can accommodate additional weight rods.

The tables below clarify which bars are applicable to which systems and parts ***in bold** indicate the standard bottom bar unless specified differently.

Core Systems

	SG 4910 / SG 4960			SG 4930 / SG 4970			SG 4840 / SG 4880		
Profile	 SG 10760*	 SG 10770	 SG 4903	 SG 10760	 SG 10770	 SG 4903*	 SG 10760	 SG 10770	 SG 4903*
Standard Cover	 SG 10761	 SG10771	 SG 11178	 SG 10761	 S 10771	 SG 11178	 SG 10761	 SG 10771	 SG 11178
Side Guide Cover	 SG 10762 / 10772 / 10641					 SG 4933 / 4932			 SG 4933 / 4932

Additional Systems

	4905	SG 4900 SG 4907	SG 4955		SG 4910 Box S	SG 4910/70 Box L
Profile	 SG 10867	 SG 10862	 SG 10862*	 SG 11442	 SG 11442	 SG 10770
Standard Cover	 SG 10685	 SG 10864	 SG 10864	 SG 11443	 SG 11443	 SG 10771
Side guide Cover	 SG 10686					

Due to the increased weight of the new bottom bars they cannot be used for System SG 4900. Therefore SG 4900 will now use as standard the SG 10862 which requires a new pull - SG 10765 which includes a child safety feature.

Obsolete Parts Summary

SG 4221 Bottom Bar (round)
 SG 10633 Bottom Bar (rectangular)
 SG 10634 Bottom Bar (rectangular)
 SG 10639 Bottom Bar Endcover (round)
 SG 10635 Bottom Bar Endcover (rectangular)
 SG 10637 Bottom Bar Endcover (oval)
 SG 10640 Bottom Bar Endcover for Side-Guide (round)
 SG 10636 Bottom Bar Endcover for Side-Guide (rectangular)
 SG 10638 Bottom Bar Endcover for Side-Guide (oval)
 SG 10645 Pull Ball for SG 4900
 SG 11043 Pull Ball with Child Safety for SG 4900

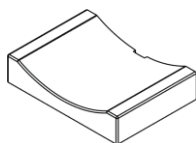

Catalogues have been updated.

New Bracket Covers for SG 4900, 4910 and 4960

The new bracket covers offer a more contemporary shape, a flush fit and include a logo.

SG 10574

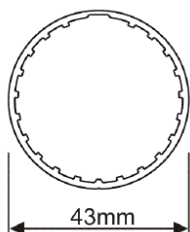

SG 10575

They are currently supplied for grey and black systems, they will be introduced for white systems once stock of existing covers have been used.

Tube Size and Adaptors for Systems SG 4710,4760,4955,4960

We have increased the diameter of the tube SG 10532 from $\varnothing 41\text{mm}$ to $\varnothing 43\text{mm}$ to avoid motor friction on the inside of the barrel.

The associated adaptors and supports have also been increased, and as part of this redesign ball bearings have been integrated into the non-motor / spring end inserts for silent operation.

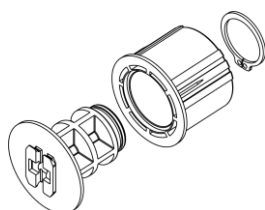

Please note that the larger tube and adaptors are not interchangeable. Blinds using different sized barrels will roll up and down at different speeds, which should be considered when blinds are installed in the same area.

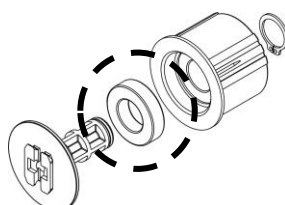

Therefore, we will continue to hold stock of the smaller $\varnothing 41\text{mm}$ barrel and associated components to accommodate warranty issues.

Tube Adaptors for SG 4910 and 4960

The SG 10556 tube adaptor used in the SG 4910 and 4960 has been redesigned to include a ball bearing connector to further reduce noise and for an even smoother operation. They are currently supplied for grey and black systems, they will be introduced for white systems once stock of existing components have been used.
